The rejection of Claims 2-7 made in the Office Action of 08/25/2005 is hereby Repeated and MADE FINAL

### **ANSWER TO ARGUMENTS**

Applicants main arguments centers around whether the reference to Lindquist et al does in fact teach a substantially air tight cover as recited in the claims. Applicant goes on to state that the operation of the wound dressing under vacuum operates differently because of the "substantially air tight cover.

Contrary to applicants assertions the examiner has taken a reasonably broad interpretation of the term "substantially air-tight". As applicant is certainly aware almost every thin plastic covering to some extent has a degree of permeability to air and other gases by the way of diffusions. Applicant has not elected to claim the specific material that forms his cover which may have the unique property of being partially impermeable to air. Applicants attempt to specify the air permeability of his cover as air-tight, has chosen a term that covers his slightly permeable cover as well as the cover recited in Lindquist.

In regard to applicants arguments regarding the substitution of the dressing in Lindquist by a dressing as taught by the reference to George, it should be noted that substitution of one dressing for another is notoriously old in the dressing art.

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any
